

dombetting project

... let's make money on sport betting

dombetting user guide

v. 1.27 (2013.12.22)

main window description

[1] % - **percent** value of odd change. In example if odd has changed from 2.09 to 1.88, the change is 10.9%. You can hide games which have low % value - see [21]

The trends:

6,3 + means that the % value of the odd has **increased**

6,3 - means that the % value of the odd has **decreased**

6,3 * means that the game has been already displayed on the game list before and now **is back**

[2] **Life** says how long [in minutes] the game will be displayed. Each new game on the list has life value equal to initial value. The initial value (X) is set in Options (go to [16] for more details). Each game will be displayed for at least X minutes. If the displayed odd changes and the percent value increases, the life parameter will be set to initial value again to display the game longer.

[3] **Date** - information about game start time. You can filter the game lists by game start time - see [19]

[4] **Start/Stop** buttons - press start to start downloading odds from Pinnacle. The odds are downloaded and compared every 1 minute.

[5] **Connection status image:**

 when application is started and correctly connected to server

 when application is NOT started or the connection is lost

[6] **League** - league and sport type description. You can filter the game list by league - see [20], and by sport type - see [17]

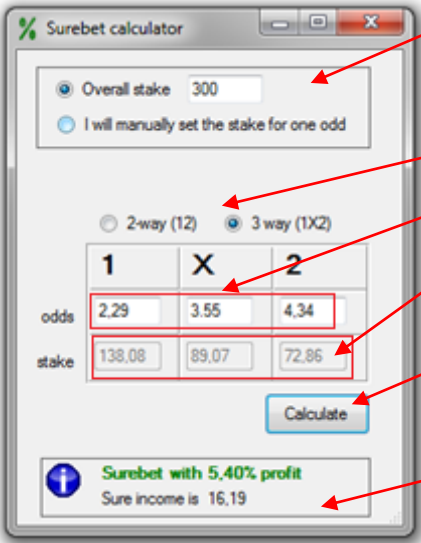

www.dombetting.com

[7] **Teams** - Home - Away teams participating in given game

[8] **Bet type** (market) - It can be a regular game or AH (Asian Handicap) or Under/Over. You can filter the game list by the bet type - see [18]

[9] **Odds** values in 1X2 (Home - Draw - Away) order. In example 2.09 -> 1.88 means that the odd has changed from 2.09 to 1.88

[10] **Surebet calculator**. If you click at odd value it would open the surebet calculator.

The screenshot shows the 'Surebet calculator' window. It features a 'Overall stake' input field set to 300, with a radio button selected for 'Overall stake' and another for 'I will manually set the stake for one odd'. Below this, there are radio buttons for '2-way (12)' and '3 way (1X2)'. A table displays odds and stakes for three outcomes: 1, X, and 2. The odds are 2.29, 3.55, and 4.34 respectively. The stakes are 138.08, 89.07, and 72.86. A 'Calculate' button is located below the table. At the bottom, a summary box shows 'Surebet with 5,40% profit' and 'Sure income is 16.19'. Red arrows point from text annotations to these specific elements.

	1	X	2
odds	2.29	3.55	4.34
stake	138,08	89,07	72,86

Annotations:

- You can you choose if you want to split the budget (overall stake), or set manual stake for one odd and let the system to calculate the other stakes.
- Setting if its 2-way or 3-way game
- Here you enter odds
- Here are the stakes calculated by the system to create a surebet (if possible)
- Calculate button which triggers calculations and displays results
- Surbet summary

[11] **Settings (options) button** - click here to display settings form. Detailed description of settings form is presented below in [settings form description](#)

[12] **Mute** all application sounds on/off button

[13] **Stay on top** on/off button

[14] **Selection** checkbox - if you want your pick to be displayed all the time, no matter if it satisfies the filter criteria, just select it and it won't disappear from the list until the match is started. In addition selected game does not trigger the visual/sound alerts except one: "contra alert" - see [22]

Since 1.26 version selecting the match automatically saves it to the csv file to help you keep and manage your records. The file location is: `\domBetting\Records\record_date.csv`. You can open it in MS Excel. Record example screen below.

	A	B	C	D	E	F	G	H	I
1	Drop value	Date	League	Team	Bet type	Home	X	Away	
2	10,73%	2013-11-16, 14:00	Hockey Russia VHL 3	HC Lipeck - Yuzhny Ural Orsk	Under/Over 5	2,03 -> 1,83		1,88 -> 2,09	
3	10,52%	2013-11-16, 17:00	Basketball Bulgarian BL	Spartak Pleven - Beroe 07	Game	1,25 -> 1,13		4,42 -> 7,04	
4	10,31%	2013-11-16, 16:59	Soccer Hungary LK	Ferencvarosi - Gyori ETO	Under/Over 2.75	1,81 -> 2,00		2,03 -> 1,84	
5	9,08%	2013-11-16, 21:00	Tennis Brazil SF	F. Volandri - T. Gabashvili	Match	1,96 -> 2,16		1,89 -> 1,74	
6	8,85%	2013-11-16, 20:59	Soccer Paraguay	Deportivo Capiata - Nacional Asuncion	Under/Over 2.25	1,96 -> 2,13		1,88 -> 1,72	
7	8,40%	2013-11-17, 06:59	Soccer Australia	Newcastle Jets - Brisbane Roar	1st Half A.H. 0	2,22 -> 2,04		1,72 -> 1,87	
8	8,57%	2013-11-16, 23:44	Soccer Peru 1	Alianza Lima - Sport Huancayo	Asian Handicap -0.75	1,80 -> 1,66		2,04 -> 2,22	
9	8,37%	2013-11-16, 17:30	Basketball Czech Mat	NH Ostrava - BK Decin	Game	1,90 -> 2,06		2,01 -> 1,85	
10	8,23%	2013-11-16, 16:00	Hockey Swe HalSve 3	Timra IK - Djurgardens IF	Asian Handicap 0.5	1,79 -> 1,93		2,15 -> 1,97	
11	8,12%	2013-11-16, 15:29	Soccer Club Friendl	Udinese - Koper	Asian Handicap -1	2,13 -> 1,97		1,78 -> 1,93	
12	7,04%	2013-11-16, 16:00	Hockey Swed Elits 3	AIK IF - Frolunda HC	Game	3,09 -> 2,96	4,04 -> 3,80	2,13 -> 2,28	
13									
14									
15									

[15] **License** expiry information. Once license expires the application will still be working but 5 best games will be partially hidden. To extend your license see [24]

Settings form description

The screenshot shows the 'Options' dialog box with the following settings and callouts:

- 16:** Application settings icon (gears).
- 17:** Markets section containing checkboxes for Soccer, Tennis, Hockey, Baseball, Basketball, US Football, and Other.
- 18:** Asian Handicap and Under/Over checkboxes.
- 19:** Drop display time is 13 minutes.
- 20:** Filter by leagues checkbox.
- 21:** Filter by bet type checkbox.
- 22:** Alerts section containing checkboxes for 'Display event when drop is above', 'Play extra sound1 when drop is above', 'Play extra sound2 when drop is above', and 'Play sound when selected drop is below'.
- 23:** 'show balloon' checkboxes for each alert.
- 24:** License section with 'Request license for 3 months'.
- 25:** Save and exit button.

[16] Application settings

- If minimized hide from Taskbar
- Load daily data on startup: If it is checked, each time you close the application and start it again, program will try to display data that were displayed before (games that already started will NOT be displayed).
- Game display time is X minutes - the initial value of the game's Life [2]. Indicated how long is displayed on the list after showing up on the list

[17] **Markets: Sport type filter** -you can set which sports you are interested in. Corresponds to [6]

[18] **Markets : Market filter** - you can set if you want also Asian Handicap or Under/Over market to be monitored. Corresponds to [8]

[19] **Start time filter** - you can filter games by start time. In example if you are interested only in games starting within next 2 hours, you should enable this filter and set it like this:

Hide matches starting after hours minutes

[20] Additional filters

- **Leagues filter** - here you can filter the game list by League description. You can exclude some games based on League description [6] (check example 20A below), or define Leagues you are interested in only. (check example 20B below).
- **Bet type filter** - here you can filter the game list by Bet type. You can exclude some games based on Bet type [8], or define Bet types you are interested in only (check example 20B below).

Filter is not case sensitive (so it doesn't matter if you write *SPAIN* or *spain*). You can use comma (,) or semicolon (;) to separate leagues. You need to write expressions that are displayed in "League" or "Bet type" column.

example 20A: excluding some leagues ("Do NOT display these leagues" option)

Let's assume there are no league filters set and we have following game list:

!	%	Life	Date	League	Teams	Bet type	1	X	2
<input checked="" type="checkbox"/>	17.2	10	09 minutes	Soccer Belgian 2	Oostende - Boussu Dour Borinage	Game	1,56 -> 1,83	4,22 -> 3,80	6,36 -> 4,45
<input type="checkbox"/>	9.3	1	39 minutes	Soccer Turkey SL	Kayserspor - Galatasaray	Game	3,91 -> 3,56	3,58 -> 3,38	2,04 -> 2,23
<input type="checkbox"/>	5.3	7	09 minutes	Soccer SloveniaPrva	Rudar - Triglav	Asian Handicap -0,75	1,88 -> 1,98		1,96 -> 1,86
<input type="checkbox"/>	4.4	10	Today, h16:59	Soccer Czech	Hradec Kralove - Sparta Praha	Asian Handicap 0,75	1,98 -> 2,06		1,94 -> 1,86
<input type="checkbox"/>	4.3	11	10 minutes	Basketball Ukraine SL	BC Dnipro - Budivelnik	Game	3,44 -> 3,85		1,36 -> 1,31
<input type="checkbox"/>	4.1	3	40 minutes	Hockey CZ ExtraL1 3	HC Energie Karlove Vary - HC Kometa Brno	Asian Handicap -1,5	1,91 -> 1,83		2,00 -> 2,09

Let's assume that for some reason we are :

- not interested in hockey games (games containing "hockey" in its League description)
- not interested in Turkey games (games containing "turkey" in its League description)

www.dombetting.com

We set leagues filter like this:

Leagues filter
Define leagues. Use comma to separate. Example: nba, Spain Cup, Italy

Do NOT display these leagues Display these leagues only

As a result we get following game list:

!	%	Life	Date	League	Teams	Bet type	1	X	2
<input checked="" type="checkbox"/>	17.2	10	06 minutes	Soccer Belgian 2	Oostende - Boussu Dour Borinage	Game	1,56 -> 1,83	4,22 -> 3,80	6,36 -> 4,45
<input type="checkbox"/>	5.3	7	06 minutes	Soccer SloveniaPrva	Rudar - Triglav	Asian Handicap -0.75	1,88 -> 1,98		1,96 -> 1,86
<input type="checkbox"/>	4.4	10	Today, h16:59	Soccer Czech	Hradec Kralove - Sparta Praha	Asian Handicap 0.75	1,98 -> 2,06		1,94 -> 1,86
<input type="checkbox"/>	4.3	11	07 minutes	Basketball Ukraine SL	BC Dnipro - Budivel'nik	Game	3,44 -> 3,85		1,36 -> 1,31

example 20B: "Display these leagues only" option

Let's assume there are no league filters set and we have following game list:

!	%	Life	Date	League	Teams	Bet type	1	X	2
<input checked="" type="checkbox"/>	17.2	10	09 minutes	Soccer Belgian 2	Oostende - Boussu Dour Borinage	Game	1,56 -> 1,83	4,22 -> 3,80	6,36 -> 4,45
<input type="checkbox"/>	9.3	1	39 minutes	Soccer Turkey SL	Kayserspor - Galatasaray	Game	3,91 -> 3,56	3,58 -> 3,38	2,04 -> 2,23
<input type="checkbox"/>	5.3	7	09 minutes	Soccer SloveniaPrva	Rudar - Triglav	Asian Handicap -0.75	1,88 -> 1,98		1,96 -> 1,86
<input type="checkbox"/>	4.4	10	Today, h16:59	Soccer Czech	Hradec Kralove - Sparta Praha	Asian Handicap 0.75	1,98 -> 2,06		1,94 -> 1,86
<input type="checkbox"/>	4.3	11	10 minutes	Basketball Ukraine SL	BC Dnipro - Budivel'nik	Game	3,44 -> 3,85		1,36 -> 1,31
<input type="checkbox"/>	4.1	3	40 minutes	Hockey CZ ExtraLi 3	HC Energie Karlove Vary - HC Kometa Brno	Asian Handicap -1.5	1,91 -> 1,83		2,00 -> 2,09

Let's assume that for some reason we are interested only in **hockey** games (games containing "hockey" in its League description) **OR** **Turkey** games (games containing "turkey" in its League description)

We set leagues filter like this:

Leagues filter
Define leagues. Use comma to separate. Example: nba, Spain Cup, Italy

Do NOT display these leagues Display these leagues only

As a result we get following game list:

!	%	Life	Date	League	Teams	Bet type	1	X	2
<input checked="" type="checkbox"/>	9.3	1	36 minutes	Soccer Turkey SL	Kayserspor - Galatasaray	Game	3,91 -> 3,56	3,58 -> 3,38	2,04 -> 2,23
<input checked="" type="checkbox"/>	4.1	3	37 minutes	Hockey CZ ExtraLi 3	HC Energie Karlove Vary - HC Kometa Brno	Asian Handicap -1.5	1,91 -> 1,83		2,00 -> 2,09

[21] Alerts - here you can set the alerts borders.

- **Display game when drop is above X %** - filtering the game list by drop percent value. Corresponds to [1]. When the drop percent value is bigger than X, then the game is displayed on the game list and an alert sound is played (click "test" button to hear corresponding alert sound). If "Show balloon" is checked, balloon notification is also displayed.

- **Play sound1 when drop is above Y %** - setting extra sound notification. When the drop percent value is bigger than Y, then the game is displayed on the game list and a **dedicated** alert sound is played (click "test" button to hear corresponding alert sound). If "Show balloon" is checked, balloon notification is also displayed.

- **Play sound2 when drop is above Z %** - setting extra sound notification. When the drop percent value is bigger than Z, then the game is displayed on the game list and a **dedicated** alert sound is played (click "test" button to hear corresponding alert sound). If "Show balloon" is checked, balloon notification is also displayed.

[22] **Contra sound** - a security alert which is played (and displayed in balloon) when selected game (see [14]) has reached low value. In example below: this alert will be triggered if selected game value [1] is below 3.

[23] **Balloon** notification example

[24] **License** - opens the tool to extend your license by X months. The procedure is described below.

[25] **Save** button - saving option changes. If you close the application and start it again, all options are remembered.

Other features

- you can sort each column by clicking on its header

- by moving mouse on odds column you will see the odds history, see picture below

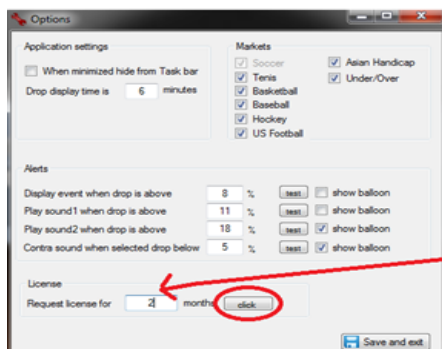

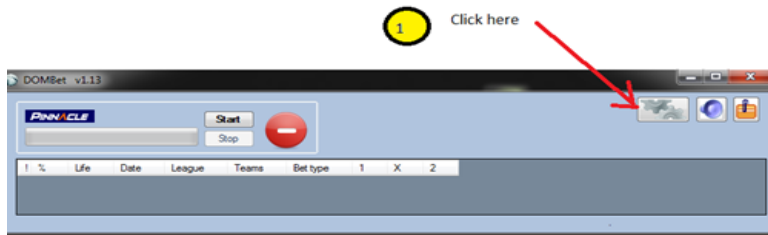

www.dombetting.com

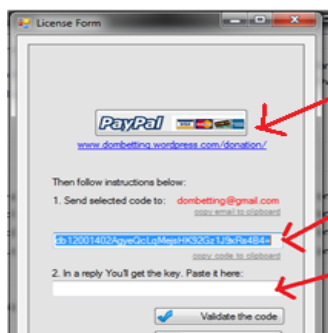

License extension procedure

if you want to extend your license follow this procedure

Go to this page: <http://dombetting.wordpress.com/donation/> and then

Type "X" and then click on "Click" button.
 If you need 1-month license, type "1".
 If you need 3-month license, type "3".
 If you need 5-month license, type "5".
 etc....

3 Make a small donation, as descibed on the page

4 Send me this code

5 In a reply I will send you the license code. Paste it here and then click "Validate the code" button
